

To all of our Business Partners: An Important Update from Norgren

None of us have ever experienced challenges as daunting as those we now all face with the emergence of COVID-19. Our health, our lifestyles, and our business operations have been disrupted. But everyone is adjusting. We all have a role to play – and we are doing so together.

Norgren is proud to be working in partnership with medical manufacturers around the world to ensure we speedily supply the components they need to address the COVID-19 pandemic. And, as the demand from the life sciences marketplace grows in urgency, our production of these essential components has kept pace. Many of our facilities and channel partners are working 24/7 and taking no shortcuts while maintaining the quality of our products. We have ramped up to nearly ten times our production capacity to deliver essential parts, such as proportional valves, which play a crucial role in the dosing of oxygen within ventilator systems.

Scott Meldeau, Vice President, Commercial – Motion Control, says, “We are now producing critical components that would ordinarily require six-to-nine-months in as little as eight weeks. In tandem with other companies, we are reducing pressure on all parts of the medical supply chain—converting much of our operations to making not only components for ventilators, but medical supplies and solutions for biopharma and diagnostic applications. We’re proud to be supplying on all fronts.”

In short, every one of us is making a difference in the war against this stealthy enemy.

Stay safe, choose best practices for health, and remember: we are in this together.

Norgren

Press Release

About Norgren

A well-respected world leader in motion control and fluid technology, Norgren is ideally placed to unearth Breakthrough Engineering solutions and play an active role in important industry sectors that contribute to the quality and success of everyday life. Norgren offers insight, technical excellence and, a collaborative approach, to help our customers forge a brighter future. Norgren's reputation rests on a world-class portfolio of high-performance products comprising of Buschjost, FAS, Herion, Kloehn, Maxseal and Thompson Valves; and an ability to deliver exceptional local service. Part of the £1.8 billion engineering group IMI plc, Norgren has a sales and service network in 75 countries, technical centres in the USA, Germany, UK and China, and manufacturing facilities around the world.

About IMI plc

IMI plc, the specialist engineering company, designs, manufactures and services highly engineered products that control the precise movement of fluids. Its innovative technologies, built around valves and actuators, enable vital processes to operate safely, cleanly, efficiently and cost effectively. The Group works with industrial customers across a range of high growth sectors, including energy, transportation and infrastructure, all of which are benefiting from the impact of long-term global trends including climate change, urbanisation, resource scarcity and an ageing population. IMI employs around 11,000 people, has manufacturing facilities in more than 20 countries and operates a global service network. The Company is listed on the London Stock Exchange.

IMI, Norgren, Buschjost, FAS, Herion, Kloehn, Maxseal and Thompson Valves are registered trademarks of IMI and Norgren companies.
