

FOR IMMEDIATE RELEASE

Nott Company Moves to State-of-the-Art Facility to Enhance Engineering and Production Services

Burnsville, MN – [Nov 5, 2024] — Nott Company is thrilled to announce its upcoming facility move from Savage, MN to a larger, world-class engineering and production facility in Burnsville, MN, designed to provide top-tier service to its valued clients. Starting January 1, 2025, Nott Company will be operating out of its new address:

12450 Oliver Ave S, Suite 100-150, Burnsville, MN 55431

This modernized space aligns with Nott Company's ongoing commitment to cutting-edge engineering and production capabilities. Equipped with the latest technology and advanced production tools, the facility will support a range of specialized services including power unit production, wire harness and control systems, valve and pump assembly, as well as fully integrated hydraulic and electrification solutions.

The new location features triple the floor space and 1.5 times more office space, allowing for enhanced operational efficiency and increased service capacity. This facility will be called the Engineered Systems and Solutions Center (ESSC), with the team benefiting from a state-of-the-art engineering lab for specialized training, 3D printing for control cabinet and joystick prototypes, wire harnessing, and comprehensive control unit testing.

Key production and assembly capabilities include:

- **Electrical & Pneumatic Assembly:** Dedicated Control Box/Pendant/Panel assembly cell with wire harness integration.
- **Hydraulic Assembly:** Cells for sectional valves, manifold valves, cartridge valves, small power units, large HPU fabrication, and hydraulic finishing/packaging.
- **Vehicle/Equipment System Integration:** Ample space to accommodate the integration of electrification, hydraulic, and pneumatic systems for large vehicles such as Class 8 trucks, harvesters and large static machine system upgrades.
- **Conveyor Belt Manufacturing:** Dedicated lines for aggregate, agricultural, and industrial conveyors.
- **Hydraulic Repair Center Cell**

This consolidated space will showcase nearly all of Nott Company's manufacturing and engineering capabilities, providing clients with a comprehensive view of its services. The customer reception area will feature display systems and conferencing technology for personalized project discussions.

Nott Company's rotomolding and petrochemical manufacturing will continue operations in the Fargo and Brooklyn Park centers, while its high-volume hose assembly facilities in Bettendorf, Fargo, Arden Hills, and Kaukauna will complement the Burnsville build centers.

"We are proud to expand into a facility that will allow us to better serve our clients and deliver on our commitment to excellence," said Markus Rauchhaus, Chief Executive Officer at Nott Company. "This

upgrade reflects our dedication to supporting the engineering and manufacturing needs of our clients with advanced capabilities and efficient processes.”

Nott Company expresses sincere gratitude for the continued support of its partners and clients and looks forward to welcoming them to the new Engineered Systems and Solutions Center.

About Nott Company

Nott Company is a leader in innovative engineering and manufacturing solutions, offering a broad range of services from control systems to hydraulic solutions, with expertise in assembly, integration, and product development across various industries.
